

WEST BAY CONSTRUCTION, INC.

General Contractors

PAST PERFORMANCE SUMMARY

1. **Project Name:** Sanitary SS Piping Installation
 - a. Kellogg's – The EGGO Company, Blue Anchor, NJ
2. **Description of Project:**
Installation of sanitary process equipment provided by Kellogg's, SS sanitary piping and piping related items.

Freezer Heat Exchanger Sanitary System and the Batter Heat Exchanger System

Assisted with unloading the equipment from the delivery truck, uncrate, dispose of the crating material, and set the heat exchangers in the orientation, location shown on the drawings.

Fabricate and install SS support brackets for the heat exchangers as per the drawings.

Provide and install 4" SS Sanitary Tubing from the two Freezer CIP Systems to the new Freezer Heat Exchanger Infeed Valve. Install the new 4" Freezer Heat Exchanger Infeed Valve with Tri-Clamp fittings at the end of the piping.

Provide and install 2" SS Sanitary Piping from the Batter CIP pump to the new Batter Heat Exchanger infeed.

COP Tank Heater Sanitary Piping

Modify the COP Tank Piping to accept the new in-line heater provided by Kellogg's. Provide and install the new heater with Tri-Clamp fittings and Sanitary Piping.

Wash Tank Heater Sanitary Piping

Modify the COP Tank Piping to accept the new in-line heater provided by Kellogg's. Provide and install the new heater with Tri-Clamp fittings and Sanitary Piping.

Batter CIP Piping Upgrades

Provide and install modifications to the 2-3" SS Sanitary Batter CIP Piping to eliminate the dead leg dip and provide a continuous drainage to the CIP Return Tank.

Mix Proof Valves

Remove the existing Valve Manifold using the Tri-Clamp fittings. Install the new Mix Proof Valve Manifold provided by Kellogg's to the outfeed Tri-Clamp fittings. Modify the existing Batter System 1 and Batter System 2 infeed piping to fit to the new Mix Proof Valve matrix.
